The GraphEx Symposium brought together leading experts from universities, industry, and government to discuss the latest research and future directions in network science and analysis. The event was limited to a small group of invited attendees. The symposium took place at the MIT Endicott House.

The Symposium Highlights:
- The two-day technical program topics of interest included: models of real-world network phenomena; methods and analysis for graph-based datasets; inference, visualization, and computation techniques for large-scale networks; construction of networks from real-world data; and challenge problems for the next decade.
