PREFACE

Graph Exploitation Symposium

The GraphEx Symposium brought together leading experts from universities, industry, and government to discuss the latest research and future directions in network science and analysis. The event was limited to a small group of invited attendees. The symposium took place at the MIT Endicott House.

Symposium Highlights

The two-day technical program topics of interest included:

- Models of real-world network phenomena
- Methods and analysis for graph-based datasets
- Inference, visualization, and computation techniques for large-scale networks
- Construction of networks from real-world data
- Challenge problems for the next decade

AGENDA

18 April 2012

01 Symposium Keynote
   Null Models for Network Data
   P. Wolfe University College London

02 Influence Propagation in Large Graphs—Theorems and Algorithms
   C. Faloutsos Carnegie Mellon University

03 Detection of Anomalous Events in Large-Scale Graphs
   M. Schmidt MIT Lincoln Laboratory

04 Theoretical and Statistical Formulations of Link Prediction Heuristics
   D. Chakrabarti Yahoo! Inc

05 Community Detection: A Bayesian Approach and the Challenge of Evaluation
   C. Phillips Sandia National Laboratories

06 Heterogeneous Graphs in Social Business
   K. Varshney IBM

07 Multiple Media Content Graphs: Design and Experiments
   C. Dagli MIT Lincoln Laboratory

08 Vertex Nomination via a Consistent Dot Product Embedding for Stochastic Blockmodel Graphs
   C. Priebe Johns Hopkins University

09 Diffuse Interface Methods on Graphs: Data Clustering and Gamma-Limits
   Y. van Gennip UCLA
